

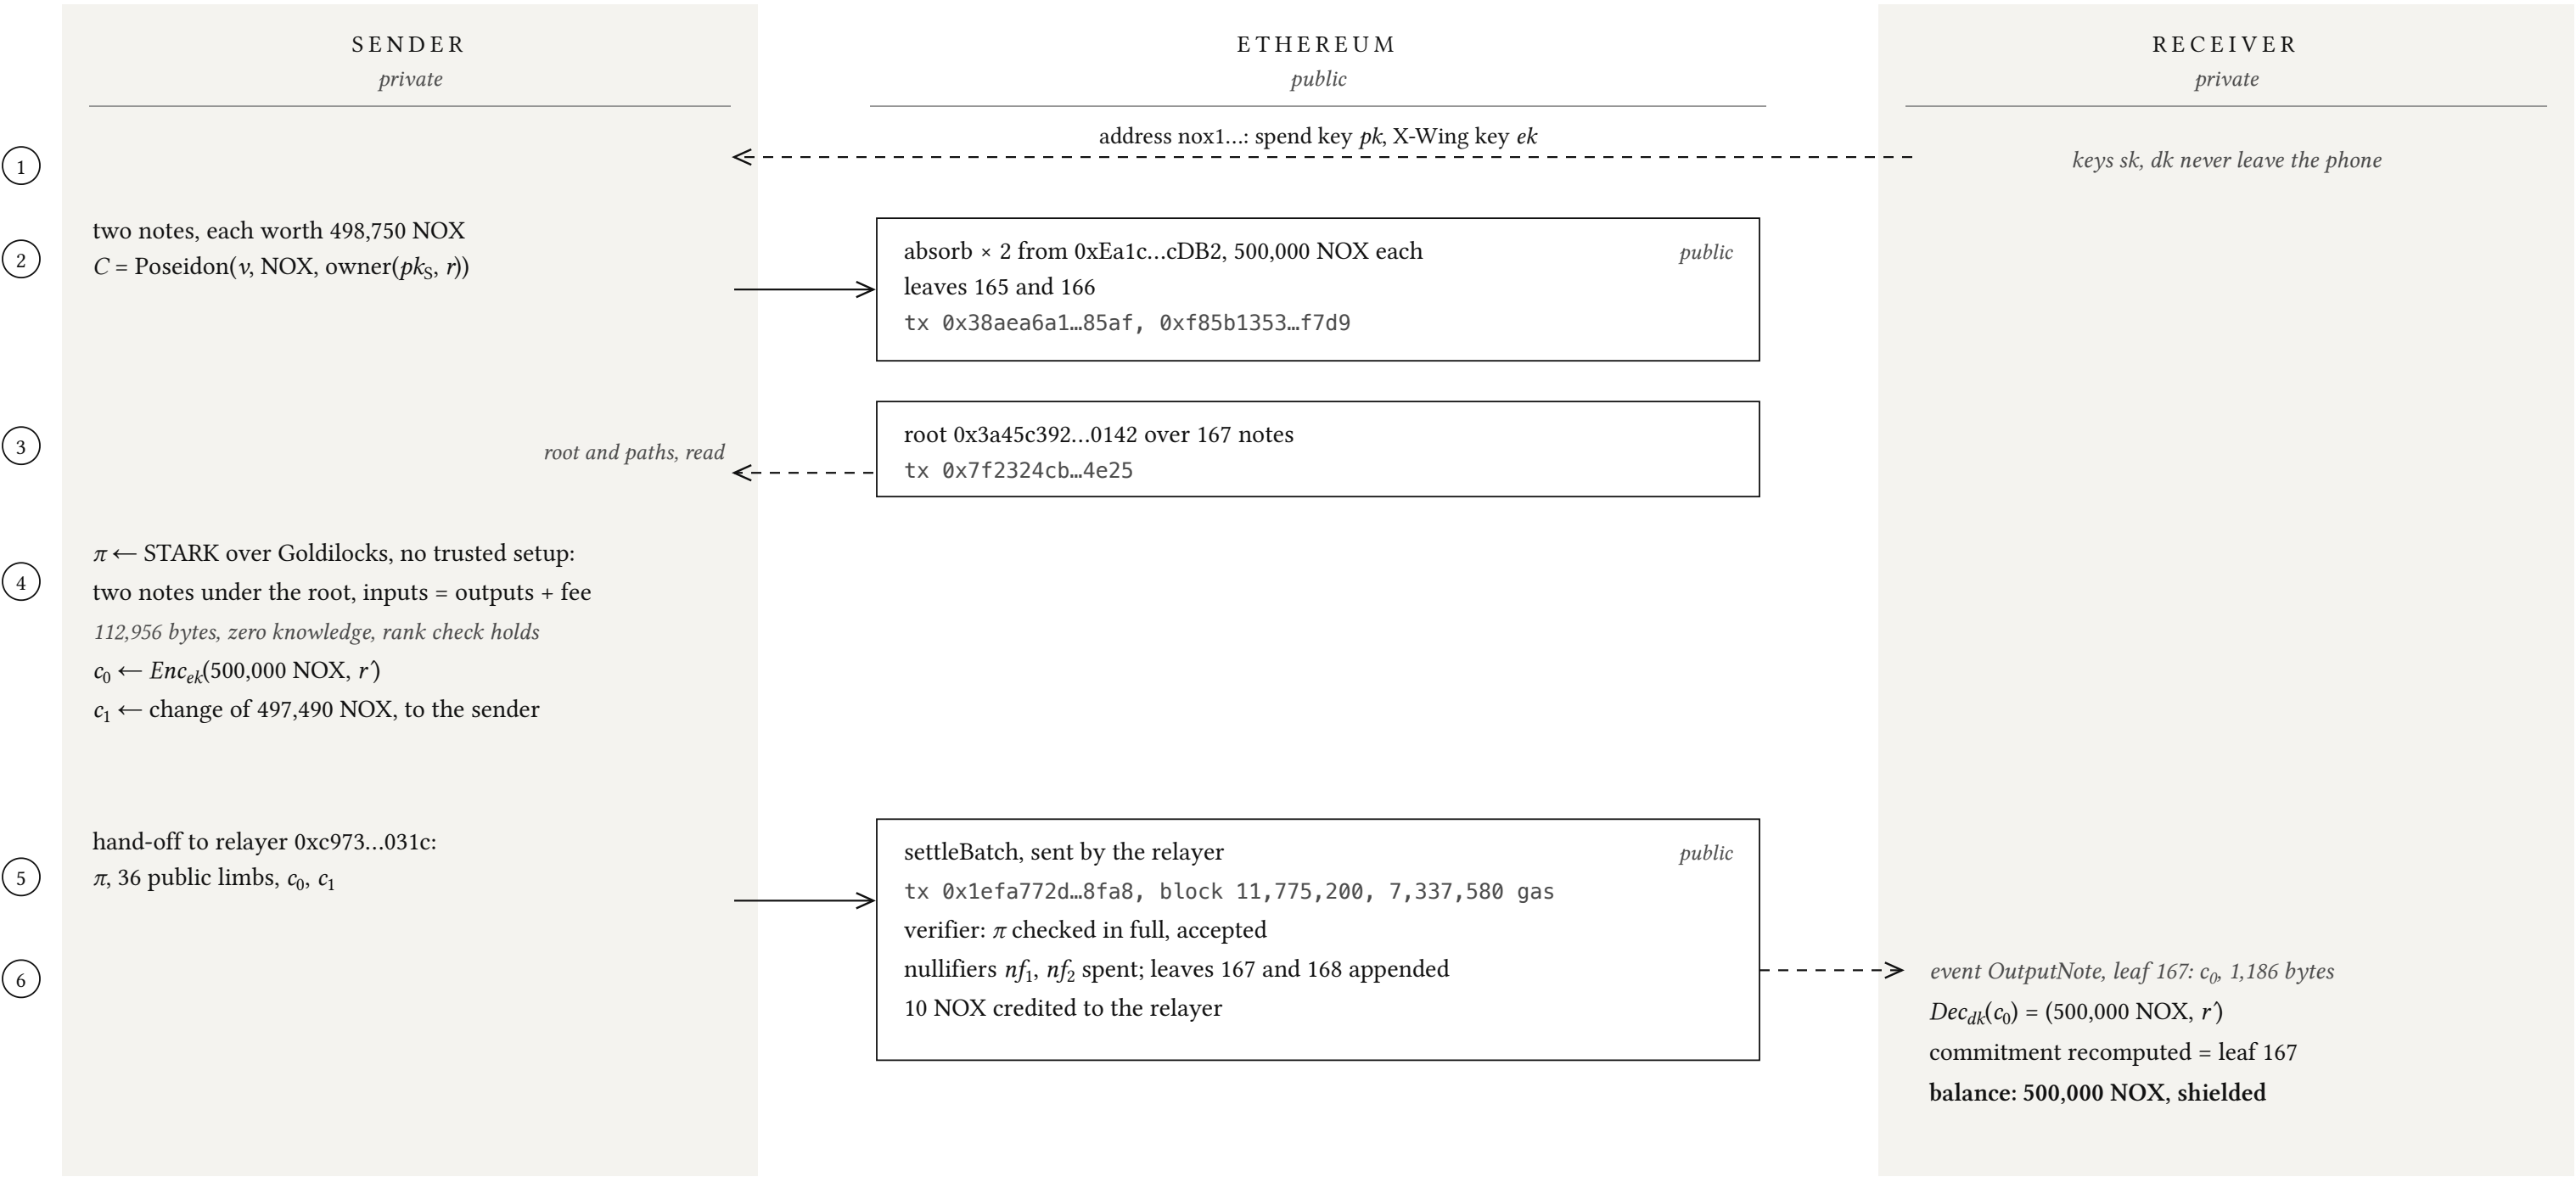

Figure 1. A private transfer on the NOX Shield launch pool, from deposit to receipt

Sepolia, 25 September 2026. Solid arrows are Ethereum transactions, dashed arrows travel off chain. The shaded columns are devices, and nothing in them is published.

Visible on chain

the depositor, its two deposits of 500,000 NOX, and the root
the relayer, two nullifiers, two commitments, two ciphertexts
the flat relay fee of 10 NOX

Absent from the public record

the sender of the transfer, its receiver, and the amount paid
which two notes were spent
A search of all 120,164 bytes of the settlement finds none of them.
